**DETAILED ACTION**

1. The amendment of 25 November 2008 has been noted and made of record.
2. Claims 1-3, 5-24, and 26-40 have been presented for examination.
3. Claims 4 and 25 have been cancelled as per Applicant's amendment.

***Response to Arguments***

4. Applicant's arguments, see pages 16 and 17, filed 25 November 2008, with respect to prior art rejections have been fully considered and are persuasive. The prior art rejections of claims 1-3, 5-24, and 26-40 have been withdrawn.

***Allowable Subject Matter***

5. Claims 1-3, 5-24, and 26-40 are allowed.
6. The following is an examiner's statement of reasons for allowance:

As noted above, the Examiner agrees with the Applicant's arguments that the prior art does not teach comparing the stored data, including the network identifier, network address and password, associated with the identified requests with a predefined pattern characterizing an attack based on the stored information and indicating an attack if all three subjects match the predefined pattern. The Examiner was also unable to find anything that would render the above argued limitations obvious. Therefore the subject matter of claims 1-3, 5-24, and 26-40 are novel and not obvious.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

9. The following patents are cited to further show the state of the art with respect to detecting brute force password attacks, such as:

United States Patent Application Publication No. 2003/0145224 A1 to Bailey, which is cited to show detecting a brute force password attack.

United States Patent Application Publication No. 2002/0046275 A1 to Crosbie et al., which is cited to show detecting intrusions by monitoring failed login attempts (paragraph 0065).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christian LaForgia whose telephone number is (571)272-3792. The examiner can normally be reached on Monday thru Thursday 7-5.

11. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kambiz Zand can be reached on (571) 272-3811. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

12. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
